Select fonts you have installed on your system. You can also remove fonts. You can preview the imported fonts. Refresh the fonts. Click the Settings button to create/save new font settings. The settings you've saved will appear in the Font Management panel. Import a Font To import a font: On the desktop, go to File > Import. Browse to the location where you have the fonts. The font file should be in.TTF format. On the Import Page, choose font type, font name, and document type. Click Next. From the File Type drop-down menu, choose a font format for your document, if necessary. If the document is a template, choose the document type from the Document Type drop-down menu, and then click Next. From the Font drop-down menu, select your font(s). For each font, select the format to use. Click Browse and find the font file. Click Import. You'll see a message indicating that the font was imported. You can add more fonts to the next import, or create new fonts. More Information Note: You can find the location where you've installed the fonts by clicking on the four-dot button at the bottom of the Font Management panel, or in the upper left corner of the panel, and then selecting Fonts. System Fonts On the mobile device: You can create new fonts or add new fonts to your device. Select Settings > General > System fonts. Create new fonts by tapping the plus sign. Add fonts by tapping the plus sign next to the font you want to add. You can edit the fonts and delete the fonts from your device. If you add fonts to your device, you can use them in documents, including templates. On the desktop: You can create new fonts or add new fonts to your system. You can edit the fonts and delete the fonts from your system. If you add fonts to your system, you can use them in documents, including templates. To make the fonts available for use by 82157476af
