

Iphost Network Monitor Keygen 14

The screenshot displays the Iphost Network Monitor Client interface. The main view shows a tree of monitors under 'All Agents (51 of 1803)'. The 'Mail Server (192.168.11.1)' is expanded, showing various services like PING, IMAP, SMTP, and POP3. The 'POP3 on Mail Server (192.168.11.102)' monitor is selected, showing a response time of 234 msec. The right panel displays a 'Summary report for POP3 on Mail Server (192.168.11.102)' with a graph of response time (msec) over time (5/18 to 5/19). The graph shows a significant spike in response time around 04:00 on 5/19. Below the graph, the report period is 5/18/2015 7:03 PM - 5/19/2015 7:03 PM, and the report notes are 'Created 05.05.2015 13:04:56, on rediscovery'. The path to this report is 'All Agents / Local Agent / Servers / Mail Server / POP3 on Mail Server'. The 'Performance and Availability Summary (with Trend Data)' section shows 'Availability' and 'Performance, msec'. The 'Logs' section shows several entries, including 'Alert 'E-mail to Administrator #1 : Send mail' executed' and 'State change [Unknown] -> [OK]'. A tooltip shows '234 msec' for the selected monitor.
