It doesn't seem to be available for other titles but it makes me wonder how much data is loaded in a game when you start it for the first time... Since games can be more than 3gb and I can't imagine that every time you start a game you have to load that much data (the 1.6gb i have on my pc), am I the only one wondering what is the exact size of that.exe file? I'm asking because I want to increase the amount of memory used by my computer, I'm using an i5 750 in dual core mode and the video card is an ATI 5750. I'm going to be using 20gb of swap space so I want to be sure that my games use the rest of the memory I have and not overload the swap space. Also, I want to create a 4gb.rar file that I can just extract a part of it into my computer so that I can use the rest of it to make a.iso file. I don't know if this is possible so if someone can tell me how I can create a 4gb.rar file on Windows Vista Ultimate 64 bit that I can just extract a part of it into my computer and use the rest of it to make a.iso file then that would be great. The reason I'm creating a.iso file is because I want to run Windows XP off it. I'll be dual booting Windows XP with a key I have on the.iso so that when I start the.iso it will automatically run Windows XP. I don't want to run Windows XP though, I want to create my own.iso file that I can extract a part of it into my computer and use the rest of it to create a Windows XP installation file to put on the Windows XP key that I have. You should download a 64 bit version of Windows XP and be able to create a.iso file without problems. I'm not sure if they changed the format and location of the ISO, but you can create a CD or DVD ISO from XP using the Windows DVD Writer. However, I'm not sure about the exact location of the.rar file. Usually, you can create a.rar file and give it a specific location and then extract the contents from the.rar file into that location. You may have to try that though. Thanks for the help. I found a way to extract it. I downloaded some extra tools from here (82157476af
